

## CLA's 5 top tips for responsible drone operation

1. Fly safely and understand the law; you are legally responsible for every flight and could be prosecuted if found to be operating a drone in an unsafe manner.
2. Respect the privacy of others and obtain permission before flying over privately owned land or property.
3. Never fly within 50 metres of people or buildings.
4. Animals can be easily be frightened by drones which can cause injury to them and others.
5. Use common sense when operating a drone: keep it in sight at all times and do not fly above 400 feet.
